

Kazi Md. Osman Goni

Full-stack Developer

Email: [KaziOsMan](#) | [Linkedin](#) | [Github](#) | Phone: 01871211687

CAREER OBJECTIVE

Motivated full-stack web developer with expertise in modern JavaScript ecosystems, including React.js, Next.js, Express.js, and MongoDB, focused on developing optimized, user-centric applications. Fast learner with strong logical thinking and teamwork abilities, aiming to drive long-term growth in global remote software engineering environments.

TECHNICAL & SOFT SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS,

Backend: Node.js, Express.js, REST API, JWT (JSON Web Token).

Database: MongoDB, MongoDB Atlas.

Tools: Git, GitHub, VS Code, Postman, Firebase, Netlify, Vercel, Chrome DevTools.

Soft Skills: Time Management, Problem Solving, Teamwork, Fast Learner,

Projects

SportNest- facility booking platform [Live](#) | [Client](#) | [Server](#)

SportNest is a full-stack sports facility booking platform that streamlines venue discovery and slot reservations for sports enthusiasts while enabling facility owners to efficiently manage listings, schedules, and bookings through a secure role-based system. Built with Next.js 15 and MongoDB, the platform delivers a responsive user experience with optimized routing, secure authentication, and real-time booking workflows.

Facility Management: Engineered full CRUD operations scoped to authenticated facility owners, with ownership-guarded update/delete actions, confirmation-gated deletions, and real-time booking status visibility per listing. **Advanced Search & Filtering:** Built dynamic search and sport-type filtering using MongoDB, combined with slot-based booking workflows that calculate total price dynamically and persist bookings with status tracking. **Dashboard:** Architected a scalable MERN +

Next.js 15 App Router frontend with JWT-based HTTPOnly cookie sessions, Better Auth and Google OAuth for protected private routes, and mobile-to-desktop responsive UI deployed on Vercel with a CORS-safe Express backend on Render.

• **Tech Stack:** Next.js, Tailwind CSS, Express.js, Node.js, MongoDB.

Digital Life Lessons – Personal Growth & Wisdom Sharing Platform [Live](#) | [Client](#) | [Server](#)

Digital Life Lessons is a full-stack knowledge-sharing platform that lets users capture, organize, and monetize meaningful life lessons through a tiered free/premium model — built with Next.js, Better Auth, MongoDB.

• **Secure Multi-Method Authentication:** Implemented Better Auth with Email/Password and Google OAuth, managing session-scoped access across public, dashboard, and admin routes to prevent unauthorized data access.

• **Role-Based Admin & Analytics Dashboard:** Built an admin panel for managing users, lessons, and reports, alongside a personal dashboard using Recharts to visualize lesson stats and engagement trends in real time.

• **Dynamic Discovery & Engagement System:** Developed search, category/tone filtering, and sorting over MongoDB queries, plus like/save/comment/report actions and a Swiper-powered home page showcasing top contributors and most-saved lessons.

Tech Stack: Next.js, Tailwind CSS, Framer Motion, HeroUI | Better Auth, Node.js (API routes) | MongoDB

EDUCATION

Rajshahi University of Engineering & Technology (RUET) On-Going B.Sc. in Electrical and Computer Engineering (ECE)
